Skills

Projects

Brewfinder(<https://brewfinder-v1.herokuapp.com/>) - HTML, CSS, and React web application using a brewery database api, and mapbox api. Gives you the ability to search for breweries by city in the United States.

Beautify(<https://beautifyapp.herokuapp.com>) - HTML, CSS, Ruby on Rails, and React web application that connects local businesses to artists. Beautify allows local businesses to create a listing for a space they are trying to add original art too, then artists have the ability to make offers on these listings, finally once the local business finds an artist they like they are able to accept offer and complete payment all through the web interface. Beautify uses Ruby on Rails for the backend, React for search functionality, and an interactive image carousel, and devise Ruby gem for the user authentication.

Experience

2017-08 - 2019-01	Communications Technician 2 <i>Comcast</i> <ul style="list-style-type: none">Identified, isolated, and troubleshooted problems in wiring, equipment and components providing the best performance for the customer.Worked independently in customers home to install and repair cable and internet services as well as build a rapport with the customer and offer excellent customer service.Used basic cable installation/service tools and software to monitor radio frequency signals coming from source node and entering into the home and adjusted the signal accordingly.Created, and adhered to a strict schedule, as well as coordinated with customers to meet appointment timelines and deadlines.
